

How Angie Harmon Uses Creative Skills And Values in the Business World

Helping African Artists Grow Their Business

Actress Angie Harmon likely has the ability to visualize images in her imagination, which is a primary talent for artists and designers.

Harmon reaches back to her childhood experiences for some of her jewelry design ideas for her collaboration with Red Earth

Harmon first learned about the philosophy of the Red Earth business model quite by accident while visiting a shop in Nashville... the city where the company is located.

Traveling within the U.S. or to foreign countries has sparked many ideas for creative ventures.
