

Personality Traits of Mini Aretha Franklin

Johanna Colon

UPDATE: Youtube has removed the official video since it went viral...

But it can be seen on ABC News. The link has been added to this list.

Granted this video is off the charts in the adorable factor... 6-year old Johanna Colon is a delightful diva talent... but watch her performance closely and you see something more in her body language...a leader and one who repeatedly displayed care and concern for her...umm... entourage.

Wanting to know more about the little dancer I went in search of an article and confirmed my impressions, but I also learned that Johanna has the ability to read people well.

So I wonder if studying the videos of other children at

recitals

might reveal clues about personality traits and aptitudes?
