

# The Book that Oprah Bought For Stanford Graduating Class

A Whole New Mind; Why Right-Brainers Will Rule the World

Although this segment of Super Soul Sunday with author Daniel Pink first aired in 2012, Oprah bought more than 4600 copies of A Whole New Mind as part of a commencement gift for the entire graduating class in 2008.

Yet in 2015, many arts related programs are being phased out of schools...

Despite the value of right-brained activities.

For example, Steve Jobs credited a class in calligraphy as the one that

helped him most in his business career because it taught him the importance of design, according to CNN.

STEM skills are considered golden.

Three areas of STEM that non stem people can adapt their skills

to fit in the technology marketplace are

Ideas

Language

Numerical
